

# Muhammad Ahmad Bashir (Curriculum Vitae)

---

## Privacy Engineer @ Google

mab@ahmadbashir.com | <https://ahmadbashir.com>

## Research Interests

Security and privacy on web/mobile; internet measurement; limiting fraud and abuse

## Education

2014-2019 **Ph.D.** in Computer Science - *Northeastern University, Boston, MA*

2008-2012 **B.S** in Computer Science - *LUMS, Lahore, Punjab, Pakistan*

**Relevant Courses:** *Machine Learning, Advanced Algorithms, Computer Security, Intensive Computer Systems*

## Employment History

<b>Google</b> (Privacy Engineer)	Feb '21 - Present
<b>International Computer Science Institute</b> (Postdoctoral Research Fellow)	OCT '19 - Jan '21
<b>Facebook Inc.</b> (Security Engineering Intern / Threat Infrastructure)	JUN '17 - SEP '17
<b>Facebook Inc.</b> (Security Engineering Intern / Online Safety)	May '16 - Aug '16
<b>Max Planck Institute for Software Systems, Germany</b> (Research Intern)	OCT '12 - JAN '13

## Key Skills

<b>Programming Languages</b>	Python, JavaScript, SQL, Java, Hack, C++, R, MATLAB
<b>Web Development</b>	Nodejs, Express, React, Django, HTML5, CSS
<b>Miscellaneous</b>	Spark, Web Automation (e.g. Selenium), Browser Extension Development

## Honors and Awards

2018	Best Student Paper Award ( <b>FPF Privacy Papers for Policymakers</b> )
2015	Best Paper Award ( <b>Conference on Online Social Networks</b> )
2015	Best Paper Award ( <b>Conference on Security and Cryptography</b> )
2012	Research Intern Fellowship ( <b>Max Planck Institute for Software Systems</b> )
2011	Winner ( <b>Ericsson – PTA Mobile Excellence Award</b> )
2011	Winner ( <b>FPF Privacy Papers for Policymakers</b> )

## Teaching Experience

Fall 2018	Teaching Assistant / Guest Lecturer (CS3700- Networks and Distributed Systems)
Spring 2018	Teaching Assistant / Guest Lecturer (CS2550- Foundations of Cybersecurity)
Spring 2013	Teaching Assistant (CS585: Service Oriented Computing)
Fall 2012	Teaching Assistant (CS582: Distributed Systems)
Spring 2012	Teaching Assistant (CS380: Databases)

## Selected Publications

IMC '19	<b>A Longitudinal Analysis of the ads.txt Standard</b> <ul style="list-style-type: none"><li>• A 15-month long study analyzing the adoption of the ads . txt standard by Alexa-100K websites.</li></ul>
NDSS '19	<b>Quantity vs. Quality: Evaluating User Interest Profiles Using Ad Preference Managers</b> <ul style="list-style-type: none"><li>• First large-scale study of the “interests” inferred by ad networks using Ad Preference Managers.</li><li>• We investigate how these interests were inferred and how useful they were according to the users.</li></ul>
IMC '18	<b>How Tracking Companies Circumvented Ad Blockers Using WebSockets</b> <ul style="list-style-type: none"><li>• First large-scale study of the “interests” inferred by ad networks using Ad Preference Managers.</li><li>• We investigate how these interests were inferred and how useful they were according to the users.</li></ul>
PETS '18	<b>Diffusion of User Tracking Data in the Online Advertising Ecosystem</b> <ul style="list-style-type: none"><li>• We model how user tracking data propagates in the advertising ecosystem because of RTB.</li><li>• We model the efficacy of ad and tracker blocking extensions at protecting users' privacy.</li></ul>
IMC '16	<b>Recommended For You: A First Look at Content Recommendation Networks</b> <ul style="list-style-type: none"><li>• First look at how content (ads and recommendations) is served by CRNs.</li><li>• Highlights the inconsistencies in how the content is served and calls for stronger regulations.</li></ul>
USENIX '16	<b>Tracing Information Flows Between Ad Exchanges Using Retargeted Ads</b> <ul style="list-style-type: none"><li>• Proposes a generic methodology to detect information sharing between ad networks.</li><li>• Detects 31% of cookie matching partners which were missed by prior methods.</li></ul>
COSN '15	<b>Strength in Numbers: Robust Tamper Detection in Crowd Computations</b> <ul style="list-style-type: none"><li>• Detection of large-scale (Sybil-tampered) crowd computations in Online Social Networks.</li><li>• Dataset consists of roughly 300M Twitter users and 30K businesses with 341K reviews from Yelp.</li></ul>
USENIX '14	<b>Towards Detecting Anomalous User Behavior in Online Social Networks</b> <ul style="list-style-type: none"><li>• Detection of anomalous identities, using PCA, on Facebook used in diverse attack strategies.</li><li>• Includes a case study on Facebook Ads to detect anomalous clicks.</li></ul>
